Summary

I am a UX Designer with four years of experience in the Health and Consulting technology industry. My strengths lie in working in dynamic cross-functional teams, participating in white boarding and prototyping sessions providing me with invaluable insight into the process, business objectives, and user requirements.

Work Experience

Avanade (Consulting)

UX Designer

2022-2023

- Designed a user-friendly web application administrative tool with Figma for a prominent chemical company, ensuring the effective delivery of crucial information.
- Collaborated with cross-functional teams to align design objectives with business goals, while also advocating for accessibility, responsiveness, and the incorporation of design principles in multiple projects.
- Held bi-weekly meetings with subject matter experts, regarding gathering insights and conducting stakeholder interviews, as well as observing user behavior.

Itemize (Startup)

UX Designer

2021-2022

- A mobile application was designed and developed as part of a multidisciplinary Scrum team to provide tech protection services to clients (B2C).
- During the agile development process, Industry standard tools, such as Figma, were used to create visually appealing mobile interfaces. After testing for usability and scalability, the application was released to the public.
- Actively sought and Implemented feedback to improve quality and effectiveness by emphasizing aesthetic, functionality, and usability for an optimal mobile application experience.
- To align design and business objectives, workshops and meetings with stakeholders were facilitated to gather requirements.

Thera-Office (HealthCare)

Account Specialist

2019-2021

- As part of a cross-functional team, I was able to conduct thorough requirements gathering to identify user problems and propose effective solutions to address those issues.
- Aided in the development of B2B health software as a service(SaaS) to healthcare private businesses across the nation.
- Revenue was generated successfully by selling software as a service (SaaS) solution.
